ChatGPT just created a new tool to catch students trying to cheat using ChatGPT

BY MATT O'BRIEN, JOCELYN GECKER AND THE ASSOCIATED PRESS
January 31, 2023 at 11:29 AM PST

The logo for OpenAI, the maker of ChatGPT, appears on a mobile phone, in New York, Tuesday, Jan. 31, 2023.
RICHARD DREW—AP IMAGES

The maker of ChatGPT is trying to curb its reputation as a freewheeling cheating machine with a new tool that can help teachers detect if a student or artificial intelligence wrote that homework.

OpenAI sued for defamation after ChatGPT fabricates legal accusations against radio host

/ ChatGPT is notorious for generating false and misleading information, but this seems to be the first defamation case filed against creator OpenAI.

By **James Vincent**, a senior reporter who has covered AI, robotics, and more for eight years at The Verge.

OpenAI has been hit with what appears to be the first defamation lawsuit responding to false information generated by ChatGPT.

A radio host in Georgia, Mark Walters, is suing the company after ChatGPT stated that Walters had been accused of defrauding and embezzling funds from a non-profit organization. The system generated the information in response to a request from a third party, a journalist named Fred Riehl. Walters' case was filed June 5th in Georgia's Superior Court of Gwinnett County and he is seeking unspecified monetary damages from OpenAI.

Report: Artificial Intelligence and the Future of Teaching and Learning

Blueprint for an AI Bill of Rights

AI should be safe and effective

AI should not discriminate unjustly

Data privacy and security should be protected

You should know when AI is being used and how it affects you

You can opt out and interact with a person

This blueprint provides necessary principles & shares potential actions. It is a tool for educating the agencies responsible for protecting & advancing our civil rights and civil liberties. Next, we need lawmakers to develop government policy that puts this blueprint into law.

Concerns around Identity

Agency

Discussion

What limitations have you experienced around assessment?

What new things do you wish you could assess?

What do we want ensure new assessment systems with AI do and don't do?

How would you like to give students agency and bring student voices into conversations about these technologies?

Share your thoughts!

Summer Discussion Series

Upcoming Sessions

July 25th: Collaborative Learning and Community Building

July 27th: Equitable and Ethical Practices and Interactions

August 2nd: Social Robotics

August 15th: Learning and Productivity
